Tax Benefits

Recommendations

- Provide a five-year fiscal roadmap for EV-related motoring taxes and incentives
- Remove the £320 VED surcharge for EVs costing over £40,000
- Allow drivers of leased or rented EVs to benefit from Enhanced Capital Allowances
- Launch a review of alternatives to CO2 based motoring taxation

SPONSORS

ASSOCIATE PARTNERS

New Vehicles

Recommendations

- Set a national quota for EV registrations that ramps up between now and 2030
- Set a ten-year strategy for battery development and associated EV technologies in the UK
- Provide more support for measures aimed at upskilling and accrediting EV retailers
- Provide more support for measures aimed at upskilling and accrediting the EV aftermarket

Charge Points

Recommendations

- Mandate universal methods of access and payment for public EV charging
- Enforce reliability and maintenance standards for public charging infrastructure
- Provide funding and support to eliminate the UK's rapid public charge point 'blackspots'
- Encourage the provision of better information on public charge point prices and times

User Sentiment

Recommendations

- Continue to support EV education and awareness initiatives, including Go Ultra Low
- Provide more support for shared-use EV mobility models, including car clubs and car rental
- Encourage the provision of better information on public charge point locations and status
- Provide more support for local EV user incentives such as reduced parking charges
